Part IV: Consciousness and Quantum Physics

By: Torben Riise, PhD

In this lecturer, we will explain the unexplainable!

Applying quantum physics to everyday situations in a completely new ways offer a provocative understanding of the universe and ourselves.

At the same time, phenomena we normally consider impossible or inconceivable, suddenly look startling possible and conceivable.

You perception of time will be warped and you will be sent to the edge of the universe without leaving your chair . . . well, actually, you will be at the edge of the universe! This promises to be a mind-opening and out-of-this-world presentation.
