

Invites You to a Lecture:

Time: Thursday, February 12 at 7:30 PM

Venue: Unitarian Universalist Congregation
7701 SW 76th Ave., Miami, 33143

Subject: **Darwin & Evolution**

Speakers: Adj. prof. Kelley Flannery Rowan, FIU
Torben Riise, PhD

Synopsis: On this day, 200 years ago, Charles Darwin was born. At the age of 35, he traveled onboard The Beagle to, among many places, the Galapagos Island. His observations there eventually lead Darwin to propose the concept of "survival of the fittest," which was later referred to as evolution.

Kelley Rowan and Torben Riise will present historical facts about and scientific concepts of evolution, and they will discuss Darwin's tremendous impact on how we came to view nature, a view that is still hotly debated in this country.

Admission: \$10
Plentiful and FREE parking
Light refreshments

Bring friends and family – Come early and network!

Admission: \$10 (students half price)
Free, plentiful parking
Light refreshments
