

the new way of learning . . .

Ethical Challenges in the 21st Century

**A series of four lectures about the issues
we face today and will face in the future.**

- A foundation in ethics/Science, faith and truth
- Transhumanism – the most dangerous idea of all?
- Bioethics and neuro-science
- Consciousness and Quantum Physics

Registration ends xxxx. For details and registration, please visit www.iihu.org

Welcome to tomorrow!

Torben Riise, PhD has given lectures and written about the ethics of new technologies for more than two decades. In a rapidly changing world, issues we thought we had come to terms with a long time ago, have changed, too. It's time to catch up!

The OpenU is the lecturing part of

The International Institute for Human Understanding
